Snow Plowing and Related Procedures

Nathan Mosher, the new Plow Contractor, asked that he do a trial storm before establishing guidelines for procedures. This has now been done and he reports that folks were generally very cooperative in moving. He has asked that you observe the following procedures going forward:

- Please group your vehicles together in the spaces in front of your units even if it means parking in a space other than that assigned to you. This will enable the plow to clear larger areas and not have to maneuver between vehicles.**
- When the storm is over and the contractor is ready to completely clear the parking spaces, please move to a cleared area.**
- If you are not going to be in residence but are leaving a vehicle on the property, please make arrangements with someone to move your vehicle.**
- Do not park in the circle in the back section in such a manner that the contractor cannot stockpile the snow. If you must park there, please group with any others at either end of the parking area.**
- This is also true of the spaces by the Pump Station next to Building H on the corner as you enter the back section. This is a stockpile area as well.**
- There will be sand/salt containers placed on the property for your use as needed to keep the walkways safe.**

BE SAFE! BE WELL! HAPPY HOLIDAYS
